DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-16, drawn to a method of making hydrogen-loaded optical fiber.

Group II, claim(s) 17-31, drawn to a system for making the hydrogen-loaded optical fiber.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the product claimed in Group II, claims 17-31 can be made without applying fluid heated to a temperature of at least about 100°C. The product claimed in Group II, claims 17-31 can be made by applying hydrogen atoms proximity of the core directly. It is noted that the apparatus claims in Group II, claims 17-31 includes method of manufacturing of the device such as "...wherein....causes a relocation of the hydrogen atoms disposed within the at least one optical fiber from the proximity of the cladding to the proximity of the core." Therefore, it is not clear whether a final product [optical fiber having hydrogen atoms

disposed proximity of the core] or intermediate product [at least one hydrogen-loaded optical fiber] is claimed in the claims.
